Testimonials

Our Doctor Say **About Us**

Their implant planning reports are extremely helpful. The measurements and

analysis are precise, and it gives us confidence before performing procedures. It feels like having an expert radiologist as part of our team.

 FAQs

Frequently Asked Questions By Customers

Get answers to dental teleradiology FAQs, including CBCT reporting, accuracy,

turnaround time, and secure data handling.

What is dental teleradiology?

Dental teleradiology is the process of sending dental imaging, such as CBCT scans, to qualified radiologists for remote interpretation. It helps clinicians receive expert reports quickly without needing an in-house radiologist.

How does dental teleradiology work?

What types of scans can be reported?

How accurate are teleradiology reports?

What is the turnaround time for reports?

Is patient data secure in dental teleradiology?

Do you provide implant planning reports?
